### Africa's oldest dinosaur found

By Alex

I heard that in Zimbabwe a scientist found the bones of a raptors bones in a desert. He took it out to the lab then found out that it was Africa's oldest dinosaur ever. When the other Africans found out they went to spread the word in it was in black history month which makes this good time for this to be found out .So if you have not heard this then this is a good time to go exploring.if you experience something similar to this situation go to the nearest lab to see what dinosaurs bone it is or just call a useful phone number too see what you have found thats it for now but Ill be back with more news St Edward's news.

A few weeks ago our very own pupil ministers, accompanied by Mrs Harris and Mrs Sidhu. They had the privilege to meet Bishop David of Northampton! Gathered together with many other schools in our diocese, the girls shared a wonderful experience. Now let's hear from our Primary minister, Chiara "Every class made amazing banners and shared them in an amazing showcase. It was also such a warm and welcoming environment!" she said.

### Our amazing Edie

By Logan, Keira-Mae and Theresa

In St Edward's we have a school dog her name is Edie.she has so many achievements like getting a painting of herself and a display board of herself in the main hall. Edie lives with Mrs Heritage at her house but only comes some days. Our school teachers have been training Edie .Some times at after school club she comes in with Mrs Heritage.She looks for some food at after-school club. Some teachers call out 2 people from my class and I think 2 people from other classes then some people walk her and they feed her . At after-school club children touch her and we have school photos of her.

### Amazing waterfalls around the world

By Riaa and Abigail

#### Amazing waterfalls

Water flows from high points to low points on earth.This rock forms an edge.This makes a waterfall. The water drops into a pool below.Waterfall can sound like a loud roar. Waterfall can have some amazing features.

#### Niagara falls

Niagara falls is the largest waterfall in North america.Its w water comes from the great lakes.More than 159 million litres of water.

### European Grass Snakes

By Barney, Aarav and Yusaf

European grass snakes are a non-venomous type of snake that can be found most commonly in marshes or grasslands.The snakes are mostly found in dark green or murky brown. They eat smaller animals and insects,they are one of the 5 rare "domestic snakes" that some people keep as house pets.
